To Whom it May Concern:

I highly recommend GFRC Shelters to any manager who values the success of their projects. To this day, I do not know who GFRC's other customers are. I have always been made to feel as if I am their only customer. Bob, Scott, and David are the foundation for an outstanding company.

GFRC has always met or exceeded my expectations, from production, to service after delivery. They are large enough to deliver in the large projects, yet small enough to take a personal interest their customer's every need. GFRC has performed exceedingly well during periods where my project plans required a large number of shelters to be produced and delivered in a short period of time. This was accomplished without a sacrifice in quality, attention to detail, or enthusiasm. GFRC has remained flexible by adjusting, or expediting, their production schedule to accommodate my rapidly changing priorities. One of GFRC's most impressive characteristics, is the service they provide after their product has been delivered. They quickly respond to my requests for service, days, nights, and weekends.

GFRC builds a solid, competitively priced shelter. Their true steel-frame construction is far superior compared to some competitor's shelters that I have purchased in the past. Additionally, GFRC uses a highly qualified team of mechanical and electrical contractors. I have had very few problems, when turning my shelters up, and no problem that was not corrected with a single phone call.

In my view, contracting with GFRC Shelters is not contracting with a vendor; it is adding a valuable group of professionals to my project team. GFRC is a pleasure to work with. I am looking forward to working with them again in the near future.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Chris Calhoun
